

Eastern Heating & Cooling Council

Training for the HVAC Professional

Residential Airflow & System Charging

EHCC has developed this combined training session to address airflow and system charging procedures and standards. Approximately two-thirds of all systems are not properly charged, and most technicians lack a sufficient understanding of airflow. In this course, students will learn correct charging procedures and airflow measurement using a method that is easy to understand. Attendees will receive an air duct calculator and will be taught the **correct** way to use it. **Technicians who complete this course will earn 6 NATE CEHs toward all re-certifications except Hydronics and 6 BPI continuing education credits.**

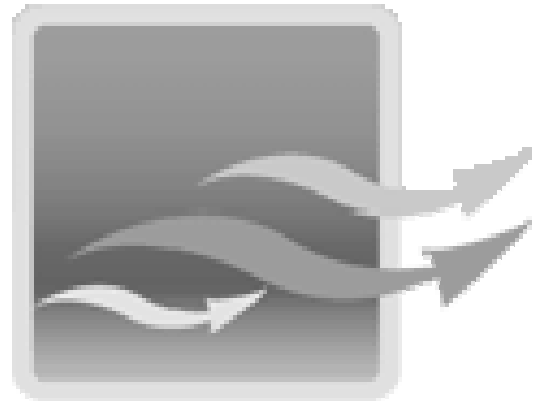

COURSE TOPICS INCLUDE:

Airflow:

- Volume-Velocity-Pressure
- Duct System Performance
- Measuring System Pressure w/Instruments
- Troubleshooting

Charging:

- Refrigeration Circuit
- Understanding Saturation
- Charging Methods
- Troubleshooting
- Do's & Don'ts

REGISTRATION FEE COVERS:

- Lunch
- Certificate of Attendance
- Course Manual
- Magnehelic Gauge, Case & Tip – over \$75 value!

Course Date: October 5, 2010
Course Time: 9:00 am – 4:00 pm
Location: Nutley Supply, Montville, NJ
Course Fee: \$125.00
EHCC Member Fee: \$75.00
